

Research Opportunity for Operation Enduring Freedom/ Operation Iraqi Freedom Veterans

*VA Investigator: Lisa Brenner, Ph.D.
COMIRB # 08-0502*

The purpose of this research study is to investigate the effects of traumatic brain injury (TBI) and/or post traumatic stress disorder (PTSD) on thought processes.

Veterans with or without these conditions may be eligible to participate.

Veterans who participate will be compensated for their time.

You may be eligible to participate if you:

- Are a United States Veteran
- Are between the ages of 18-40
- Have been deployed to Iraq and/or Afghanistan
- Receive physical and/or mental health care through the VA

If you choose to participate you will:

- Answer questions about your feelings, thoughts, and behaviors
- Complete paper and computerized tests of thinking and memory
- Receive an MRI

Who should you contact if you are interested in participating?

- If you are interested in participating in this study or if you have questions please call the Study Coordinator, **Elissa Roesch, 303.399.8020 x5634**
