Program Description: Risk management is a necessity of mental health practice and this requires a thoughtful approach to suicide risk assessment and management. Home visits are recommended in the VA/DoD Clinical Practice Guideline for the Assessment and Management of Patients at Risk for Suicide. This virtual knowledge-based webinar training will inform attendees and healthcare teams about the research done on home visits that led to this recommendation. This training will also describe a clinical program, called the HOME Program, that involves a home visit and has been implemented in VA.
