The Self-Directed Violence Classification System (SDVCS)

The Utility of a Common Language for Suicidal Ideation and Behavior

Rocky Mountain Mental Illness, Research, Education and Clinical Center (MIRECC)
Disclosure Statement

This presentation is based on work supported, in part, by the Department of Veterans Affairs, but does not necessarily represent the views of the Department of Veterans Affairs or the United States Government.
Training Overview

**Objective:** to learn and begin using a new nomenclature for self-directed violence

1. Why is it important to have a common language?
2. A Solution to the Problem
3. What does SDVCS look like?
4. How do I use it?
1. The Language of Self-Directed Violence

Why is it important to have a common language?
Common Language and Suicide

Having a common language around suicide promotes recovery oriented and person centered care

- Contributes to a shared understanding that can facilitate support
- Reduces bias and discrimination
- Increases respect
- Enhances communication among clinicians, gatekeepers, patients, and families
- Promotes accurate and neutral descriptions of self directed violence
- Facilitates recovery
Why do we need this for self-directed violence?

A healthy 24-year-old female is brought by her boyfriend to the Emergency Department after she ingested all remaining pills in a bottle of regular strength Tylenol. She estimates there were 4 to 6 pills total in the bottle and she reports no ill effects. Lab tests done at the time of admission to the ED reported her acetaminophen level within the therapeutic range. During triage, she states that before she took the pills she was upset from arguing with her boyfriend and just wanted to die. She feels better now and requests to go home.

**What would you call this behavior?**
- Gesture?
- Threat?
- Acting Out/Manipulation?
- Attempt?
- Cry for help?
- Other?

**What criteria did you use to decide?**
- Lethality of method?
- Expressed intent?
- Number of pills ingested?
- Lab results?
- Other?
The Problem

Aborted Suicide Attempt
Attempted Suicide
Committed Suicide
Cry for Help
Death Rehearsals
Deliberate Self-Harm
Failed Attempts
Failed Completion
Failed Suicide
Intentional Self-Murder
Intentional Suicide
Non-Suicidal Self-injury

Parasuicide
Rational Suicide
Self-Harm Behavior
Self-Inflicted Behavior
Self-Injurious Behavior
Suicidal Episode
Suicidal Gesture
Suicidal Manipulation
Suicidal Rehearsal
Suicide Victim
Successful Attempt
Successful Suicide
Unintentional Suicide
Implications of the Problem

Clinical
• Impedes communication between and among clinicians, patients and patients’ families

Research
• Introduces challenges for conducting longitudinal research with those who have attempted suicide

Public Health
• Difficult to accurately count the number of suicides and suicide attempts that occur annually

Public Policy
• Difficult to establish suicide as a major public health problem that warrants investment of resources
2. A Solution to the Problem

Nomenclature

Classification System
What is a nomenclature?

**What is a nomenclature?**

Nomenclature (def.) - a set of terms that are:
- Commonly understood
- Widely acceptable
- Comprehensive

**What is the purpose of a nomenclature?**

- Enhance clarity of communication
- Have applicability across clinical settings
- Be theory and culturally neutral
- Use mutually exclusive terms that encompass the spectrum of thoughts and actions
What is a Classification System?

- Classification Builds upon a nomenclature (e.g., terminology)
- “Exhaustive” categorization and breakdown of subtypes of related behaviors (e.g., covers all possibilities)
- Further differentiates amongst phenomena that appear to be similar by use of modifiers
CDC developed uniform definitions and recommended data elements for surveillance efforts.

Rocky Mountain MIRECC developed the SDVCS which is compatible with and an expansion of the CDC’s terms.
Self-directed violence is the intentional use of physical force or power, threatened or actual, against oneself, another person, or against a group or community, which results in or has a high likelihood of resulting in injury, death, psychological harm, maldevelopment, or deprivation.

(Source: World Health Organization)
3. What does SDVCS look like?
**SDVCS Structure**

- Suicidal and non-suicidal SDV

- 22 terms
  - Mutually exclusive
  - Culture and theory neutral
  - Encompasses the spectrum of SDV-related thoughts and behaviors

- SDVCS Table and Clinical Tool
# Self-Directed Violence (SDV) Classification System
## Clinical Tool

### Key Terms (Centers for Disease Control and Prevention)

<table>
<thead>
<tr>
<th>Term</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Self-Directed Violence</td>
<td>Behavior that is self-directed and deliberately results in injury or the potential for injury to oneself.</td>
</tr>
<tr>
<td>Suicidal Intent</td>
<td>There is past or present evidence (implicit or explicit) that an individual wishes to die, means to kill him/herself, and understands the probable consequences of his/her actions or potential actions. Suicidal intent can be determined retrospectively and in the absence of suicidal behavior.</td>
</tr>
<tr>
<td>Preparatory Behavior</td>
<td>Acts or preparation towards engaging in Self-Directed Violence, but before potential for injury has begun. This can include anything beyond a verbalization or thought, such as assembling a method (e.g., buying a gun, collecting pills) or preparing for one’s death by suicide (e.g., writing a suicide note, giving things away).</td>
</tr>
<tr>
<td>Physical Injury (paraphrased)</td>
<td>A bodily lesion resulting from acute overexposure to energy (this can be mechanical, thermal, electrical, chemical, or radiant) interacting with the body in amounts or rates that exceed the threshold of physiological tolerance (e.g., bodily harm due to suffocation, poisoning or overdoses, lacerations, gunshot wounds, etc.). Refer to the Classification System for the Centers for Disease Control and Prevention definition.</td>
</tr>
<tr>
<td>Interrupted By Self or Other</td>
<td>A person takes steps to injure self but is stopped by self/another person prior to fatal injury. The interruption may occur at any point.</td>
</tr>
<tr>
<td>Suicide Attempt</td>
<td>A non-fatal self-inflicted potentially injurious behavior with any intent to die as a result of the behavior.</td>
</tr>
<tr>
<td>Suicide</td>
<td>Death caused by self-inflicted injurious behavior with any intent to die as a result of the behavior.</td>
</tr>
</tbody>
</table>

---

**Behaviors**

**Thoughts**

Reminder: Behaviors Trump Thoughts
Key Concept- Suicidal Intent

There is past or present evidence (implicit or explicit) that an individual:

1. Wishes to die
2. Means to kill him/herself, and
3. Understands the probable consequences of his/her actions or potential actions
4. How do I use it?
Example - John

John tells you that he was thinking about suicide last night. He says he can’t take the pain anymore, and to stop it he thought about killing himself with the gun he keeps in his nightstand. However, instead of getting his gun out, he decided to go to sleep.
Self-Directed Violence (SDV) Classification System
Clinical Tool

BEGIN WITH THESE 3 QUESTIONS:
1. Is there any indication that the person engaged in self-directed violent behavior that was lethal, preparatory, or potentially harmful?
   (Refer to Key Terms on reverse side)
   IF NO, proceed to Question 2
   IF YES, proceed to Question 3
2. Is there any indication that the person had self-directed violence related thoughts?
   IF NO to Questions 1 and 3, there is insufficient evidence to suggest self-directed violence → NO SDV TERM
   IF YES, proceed to Decision Tree A
3. Did the behavior involve any injury or did it result in death?
   IF NO, proceed to Decision Tree B
   IF YES, proceed to Decision Tree C

DECISION TREE A: THOUGHTS

Was/are the thoughts suicidal?

No

Non-Suicidal SDV

Suicidal Ideation,
Without Undetermined
Suicidal Intent

Yes

If the thoughts were/saw suicidal, is there evidence of Suicidal Intent?

No

Suicidal Ideation,
With Undetermined
Suicidal Intent

Yes

Suicidal Ideation,
Without Suicidal Intent

Suicidal Ideation,
With Suicidal Intent

DECISION TREE B: BEHAVIORS, WITHOUT INJURY

Was the behavior preparatory only?

No

Was the behavior interrupted by Self/Other?

Yes

Non-Suicidal SDV,
Without Injury

No

Is there evidence of suicidal intent?

Yes

Underdetermined
SDV, Preventatory

Undetermined
SDV,
Preparatory

Non-Suicidal
SDV, Preventatory

No

Suicide Attempt,
Without Injury

Undetermined
SDV, With Suicidal Intent

Non-Suicidal
SDV, Without Injury

Suicide Attempt,
Without Injury,
Interrupted by Self/Other

Undetermined
SDV, Preventatory

No

Non-Suicidal
SDV,
Without Injury

Non-Suicidal
SDV, Preventatory

Non-Suicidal SDV,
Preparatory

Suicide Attempt,
Without Injury

Interrupted by Self/Other

DECISION TREE C: BEHAVIORS, WITH INJURY

Was the injury fatal?

No

Was the behavior interrupted by Self/Other?

Yes

Non-Suicidal SDV,
With Injury

No

Is there evidence of suicidal intent?

Yes

Unidentified SDV, Fatal

Non-Suicidal
SDV, Fatal

Suicide Attempt,
With Injury

Undetermined
SDV, With Suicidal Intent

Non-Suicidal
SDV, With Injury

Suicide Attempt,
With Injury,
Interrupted by Self/Other

Undetermined
SDV, Preventatory

No

Non-Suicidal
SDV, With Injury

Non-Suicidal
SDV, Preventatory

Non-Suicidal SDV,
Preparatory

Suicide Attempt,
With Injury

Interrupted by Self/Other
BEGIN WITH THESE 3 QUESTIONS:

1. Is there any indication that the person engaged in self-directed violent behavior that
was lethal, preparatory, or potentially harmful?
(Refer to Key Terms on reverse side)
If NO, proceed to Question 2
If YES, proceed to Question 3

2. Is there any indication that the person had self-directed violence related thoughts?
If NO to Questions 1 and 2, there is insufficient evidence to suggest self-directed
violence (NO SDV TERM)
If YES, proceed to Decision Tree A

3. Did the behavior involve any injury or did it result in death?
If NO, proceed to Decision Tree B
If YES, proceed to Decision Tree C
Example 1

1. Is there any indication that the person engaged in self-directed violent behavior that was lethal, preparatory, or potentially harmful? (Refer to Key Terms on reverse side)

   No.

   If NO, proceed to Question 2
   If YES, proceed to Question 3
Example 1

2. Is there any indication that the person had self-directed violence related thoughts?

Yes.

If NO to Questions 1 and 2, there is insufficient evidence to suggest self-directed violence (NO SDV TERM)
If YES, proceed to Decision Tree A
Example 1

DECISION TREE A: THOUGHTS

Were/Are the thoughts suicidal?

- Yes
  - If the thoughts were/are suicidal, is there evidence of Suicidal Intent?
    - Yes
      - Suicidal Ideation, With Suicidal Intent
    - No
      - Suicidal Ideation, Without Suicidal Intent
- No
  - Non-Suicidal SDV Ideation

Suicidal Ideation, With Undetermined Suicidal Intent

Suicidal Ideation, Without Suicidal Intent

Suicidal Ideation, With Suicidal Intent
John tells you that he was thinking about suicide last night. He says he can’t take the pain anymore, and to stop it he thought about killing himself with the gun he keeps in his nightstand. However, instead of getting his gun out, he decided to go to sleep.
John tells you that he was thinking about suicide last night. He says he can’t take the pain anymore, and to stop it he thought about killing himself with the gun he keeps in his nightstand. However, instead of getting his gun out, he decided to go to sleep.

**DECISION TREE A: THOUGHTS**

- Were/Are the thoughts suicidal?
  - Yes
    - If the thoughts were/are suicidal, is there evidence of Suicidal Intent?
      - No.
John tells you that he was thinking about suicide last night. He says he can’t take the pain anymore, and to stop it he thought about killing himself with the gun he keeps in his nightstand. However, instead of getting his gun out, he decided to go to sleep.

**DECISION TREE A: THOUGHTS**

- Were/Are the thoughts suicidal?  
  - Yes
  - If the thoughts were/are suicidal, is there evidence of Suicidal Intent?  
    - No
    - Suicidal Ideation, Without Suicidal Intent

  • Suicide |

* Developed in collaboration with the Centers for Disease Control and Prevention
Example 2

A Veteran is despondent over his pending divorce and failing health. He writes a suicide note, smokes marijuana, and gets into his car with the plan to drive into a concrete wall. On the way, he is stopped by police for speeding and reckless driving, and is arrested due to an outstanding warrant.
BEGIN WITH THESE 3 QUESTIONS:

1. Is there any indication that the person engaged in self-directed violent behavior that was lethal, preparatory, or potentially harmful? (Refer to Key Terms on reverse side)
   If NO, proceed to Question 2
   If YES, proceed to Question 3

   Yes.

3. Did the behavior involve any injury or did it result in death?
   If NO, proceed to Decision Tree B
   If YES, proceed to Decision Tree C

   No.
A Veteran is despondent over his pending divorce and failing health. He writes a suicide note, smokes marijuana, and gets into his car with the plan to drive into a concrete wall. On the way, he is stopped by police for speeding and reckless driving, and is arrested due to an outstanding warrant.
A Veteran is despondent over his pending divorce and failing health. He writes a suicide note, smokes marijuana, and gets into his car with the plan to drive into a concrete wall. On the way, he is stopped by police for speeding and reckless driving, and is arrested due to an outstanding warrant.

DECISION TREE B: BEHAVIORS, WITHOUT INJURY

Was the behavior preparatory only?

- No

Was the behavior interrupted by Self/Other?

- No

Yes
A Veteran is despondent over his pending divorce and failing health. He writes a suicide note, smokes marijuana, and gets into his car with the plan to drive into a concrete wall. On the way, he is stopped by police for speeding and reckless driving, and is arrested due to an outstanding warrant.
Let’s review criteria for intent

There is past or present evidence (implicit or explicit) that an individual:

1. wishes to die
2. means to kill him/herself, and
3. understands the probable consequences of his/her actions or potential actions

A Veteran is despondent over his pending divorce and failing health. He writes a suicide note, smokes marijuana, and gets into his car with the plan to drive into a concrete wall. On the way, he is stopped by police for speeding and reckless driving, and is arrested due to an outstanding warrant.
DECISION TREE B: BEHAVIORS, WITHOUT INJURY
