

# Department of Veterans Affairs

## Advanced Fellowship in Mental Illness

### Postdoctoral Big Data Research Fellow

Fellow may focus their research and career development in these core areas:

Public Health  
Suicide Prevention

Epidemiology/  
Biostatistics

Health Services  
Research

Traumatic Brain  
Injury

Seeking applicants for a two-year, non-clinical, postdoctoral position that combines individualized, mentored research and training of data scientists and researchers in the high priority area of Veteran suicide risk and prevention.

Big Data Fellows will learn to manage, design and analyze large-scale, multiple element biological and/or non-biological patient data sets that contribute to suicide prevention research.

Primary mentorship will be provided by **Bryann DeBeer, PhD, Andrew Hoisington, PhD, or Claire Hoffmire, PhD**, depending on fit.

**Location:** Denver, Colorado

**Deadline:** Applicants are encouraged to apply and may be reviewed on a rolling basis until positions are filled.
