Are you a VETERAN willing to help with brain research?

HAVE YOU HAD A **CONCUSSION**, OR BEEN NEAR **EXPLOSIONS**?

**OR**

DO YOU SUFFER FROM **SYMPTOMS OF PTSD**?

We are studying brain health following trauma.

The study includes an assessment of your physical and mental health. You will also receive prazosin (a pill used for PTSD and high blood pressure).

The study will take about 22 hours, spread over roughly 12 visits during a 3-month period. These visits will be at our clinic at the Seattle VA. You will be compensated for each of your visits, with the total compensation for the study amounting to $775–$850.

Please contact the research coordinator, Andrew Nicholls, at 206.764.2756 or 1.800.329.8387 ext. 62756 for more information.
