Join a study of Iraq and Afghanistan War Veterans to help us learn more about mild traumatic brain injury (mTBI)

- We are looking for Veterans with and without mTBI (concussion)
- Volunteers will be asked to come to VA Puget Sound for 1 to 5 study visits every two years to answer questions about their medical history and participate in brain imaging, memory and cognitive testing, and an optional lumbar puncture
- Volunteers will receive compensation for their time and travel
- You may be eligible if you are over the age of 18 and are a US military Veteran who served in Iraq or Afghanistan after October 7, 2001

For more information, call the Study Coordinator at 206.277.1272 or the research hotline at 206.277.5566.

GIVE A HAND TO OTHER VETERANS
