Worrying About Your Memory?

Join the MIND Study

A Research Study for Mild Cognitive Impairment (MCI)

The Memory Improvement Through Nicotine Dosing (MIND) study will determine whether daily nicotine patch as compared to placebo, will have a positive effect on early memory loss in people diagnosed with MCI.

We need your help.
If you are a healthy, non-smoking adult age 55+ and are interested in learning more about this study, please visit MINDstudy.org or call (206) 764-2069. There is no cost to participate.
