

# BHL Software

*Technology for a  
New Era of  
Measurement-Based  
Care*

BHL Software is a flexible and user-friendly tool that interfaces with the electronic medical record (CPRS, Cerner) to facilitate the delivery of measurement-based care (MBC) in a variety of mental health care settings.

## **ASSESS**

- Over 40 assessments available
- Patient direct entry available with iPad app
- Algorithm-based treatment decisions

## **TRACK**

- Manage your panel of patients
- Monitor patient progress over time
- Identify at-risk patients quickly

## **EDUCATE**

- Targeted recommendations based on reported symptoms
- Personalized patient-facing reports with visuals of treatment progress

## **EVALUATE**

- Easily access program outcome data
- Quickly generate reports on symptom changes at the program/clinic level
