Overview: The Mental Illness Research, Education and Clinical Center (MIRECC) at the VAPHS is recruiting physicians, clinical psychologists, physicians, nurses, and other associated health clinicians for a 2-year clinical research fellowship program. The primary goal of the fellowship program is to train MD and PhD postdoctoral fellows to become leaders in Precision Mental Health Care research—including basic and clinical sciences, and health services research with the aim of enhancing the efficacy and impact of evidence-based treatments for Veterans with mental illness. Within the broad scope of Precision Mental Health Care, our MIRECC focuses on research that targets: 1) identification, validation and incorporation of putative biomarkers/other measures of disease, disorder and problems for incorporation in evidence-based care, 2) development of intervention tools, treatment algorithms and decision aids, to influence treatment choice, treatment planning and program management (integral to precision mental health care), and 3) the incorporation of implementation science in the translation and implementation of the products of precision mental health science to practice. The long-term mission of MIRECC-funded research and training is to improve the mental and physical health, quality of life, and outcomes of healthcare services for Veterans with mental illness.

Program Description: This interdisciplinary program aims to train physicians, clinical psychologists, physicians, nurses, social workers and other associated health graduates to become outstanding clinical researchers in high priority areas of mental health. Individualized, mentored research and clinical training is combined with a state-of-the-art curriculum that emphasizes research methods, statistics, epidemiology, mental health systems, quality improvement methods, education, and service delivery that center on the whole person. Training in professional skills includes manuscript preparation, grant writing, project management, networking, and the responsible conduct of research. Fellowship sites across the national network of VA Advanced Fellowship training sites are linked electronically for collaboration with their mentors, fellows will develop and implement a research project, publish, and present findings, participate in grant writing, and utilize the latest technology for educational activities and clinical service delivery. MD applicants must have completed ACGME-accredited residency training, be board eligible or board certified, and have an active, unrestricted U.S. license to practice. The VA funds fellows’ stipends in amounts based on previously completed ACGME accredited residency training.

Faculty: Mentees often have dual mentorship including a mentor from the University of Pittsburgh (Pitt) in addition to VAPHS. Based on your research focus, Pitt/VA investigators not listed can participate on mentorship teams as appropriate. Research must be conducted primarily at the VA. Available research mentors (and interests) from VAPHS (bolded) and the University of Pittsburgh include:

- Adam Bramoweth, PhD (sleep, implementation science)
- Meryll Butters, PhD (sleep, implementation science)
- Daniel Buyse, MD (sleep interventions, neurobiology of sleep)
- Judith Callan, PhD, RN (technology interventions, CBT, mood D/O)
- Matthew Chinman, PhD (implementation science, peer support)
- Fabio Ferrarelli, MD, PhD (Transcranial Magnetic Stimulation, SMII)
- Zachary Freyberg, MD, PhD (basic science of psychiatric disorders)
- Ariel Gildengers, MD (late-life bipolar disorder)
- Gretchen Haas, PhD (suicide, social cognition, psychosis)
- Brant Hasler, PhD (sleep, circadian rhythm)
- Heeyoung Lee, PhD (schizophrenia, clinical trials)
- Adam Aizenstein, MD (neuroimaging, late-life mood disorders)
- Meryl Butters, PhD (late-life cognition, dementia)
- Daniel Buyse, MD (sleep interventions, neurobiology of sleep)
- Judith Callan, PhD, RN (technology interventions, CBT, mood D/O)
- Matthew Chinman, PhD (implementation science, peer support)
- Fabio Ferrarelli, MD, PhD (Transcranial Magnetic Stimulation, SMII)
- Zachary Freyberg, MD, PhD (basic science of psychiatric disorders)
- Ariel Gildengers, MD (late-life bipolar disorder)
- Gretchen Haas, PhD (suicide, social cognition, psychosis)
- Brant Hasler, PhD (sleep, circadian rhythm)
- Heeyoung Lee, PhD (schizophrenia, clinical trials)
- Adam Aizenstein, MD (neuroimaging, late-life mood disorders)
- Meryl Butters, PhD (sleep, implementation science)
- Daniel Buyse, MD (sleep interventions, neurobiology of sleep)
- Judith Callan, PhD, RN (technology interventions, CBT, mood D/O)
- Matthew Chinman, PhD (implementation science, peer support)

Application Due Date: Review of applications will start Dec. 1, 2023, with an application deadline of Dec. 18, 2023. The program is observing COVID safety precautions. Interview arrangements (virtual or in-person) will be made accordingly.

How to Apply: Interested physicians who meet the eligibility requirements should send a cover letter, CV, transcripts, and three letters of recommendation to Gretchen L. Haas, PhD (haasgl@upmc.edu) and Sara Chapman, MS, OTR/L (sara.chapman@va.gov). The cover letter should specify the reasons for your interest in this particular fellowship training program, a brief overview of your previous clinical and research experiences, investigators you are interested in working with, and how you see this program promoting your professional and career goals.
