The alignment of Asian American and Pacific Islander Heritage Month in May with PTSD Awareness Month in June elicited self-reflection on a pivotal opportunity that I had more than 20 years ago to collaborate as a co-investigator with Dr. Chalsa Loo on her ground-breaking VA Merit Review research project examining race-related trauma and PTSD among Asian American and Pacific Islander Veterans of the Vietnam war (Loo et al., 2001; 2005). Findings from in-depth structured interviews revealed that Asian American and Pacific Islander Vietnam Veterans with PTSD often reported exposures to adverse race-related stressors that, for some, included abuse and violence, often perpetrated by fellow military service members. A striking finding was that exposure to such adverse race-related stressors accounted for a significant amount of the variance in predicting PTSD in this sample of Vietnam Veterans, over and above that accounted for by combat exposure. Thus, many Asian American and Pacific Islander Veterans who served in the Vietnam war were at increased risk for PTSD not only from exposure to combat, but from exposure to traumatic race-related events, as well.

For the Mid-Atlantic MIRECC, a legacy of Dr. Loo’s important research on racism and PTSD is our commitment to address issues of diversity, equity, and inclusion in our research, education, and clinical training activities to improve the mental health of all Veterans and their families. In a future issue of this quarterly newsletter, we will provide an update on the progress of our work in this critical arena.

In March, Mental Health and Chaplaincy changed its program name to Integrative Mental Health (IMH). The shift reflects our ongoing commitments to key programmatic initiatives and our focus on the intersections of spiritual and psychosocial care as well as plans to adapt and expand efforts in other areas. For more information, click here.

Dr. Shannon Blakey, (MIRECC Postdoctoral Fellow, Durham site) led a new VA study that found Veterans’ combat experiences are associated with a higher risk of alcohol use to cope with PTSD symptoms. But the connection is weaker when accounting for the severity of the PTSD. In observational study of more than 11,000 men with at least one traumatic experience, the researchers found that those with combat experience were much more likely than those without to report drinking alcohol to cope with PTSD. The diversity of traumatic experiences, the severity of PTSD, and diagnoses of alcohol abuse or dependence were significantly tied to drinking to cope with PTSD.

However, combat experience was not strongly linked to drinking to cope when the researchers adjusted for a person’s total number of PTSD symptoms. (Read more)

Honors & Awards

Dr. Robin Hurley, MIRECC Associate Director of Education, served as President of the American Neuropsychiatric Association from March 2019 to March 2021. She will serve as Immediate Past President from March 2021 to March 2023.

Dr. Shannon Blakey, (MIRECC Postdoctoral Fellow, Durham site) was selected for the OAA Advanced Fellowship in Mental Illness and Research Treatment (MIRT) Book Award, which recognizes one first-, second- and third-year MIRT fellow for outstanding research accomplishments.

Dr. Blakey also chaired a virtual professional development panel, sponsored by the Association for Behavioral and Cognitive Therapies that focused on VA and DOD.

Webinars

Dr. Nate Kimbrel, MIRECC Co-Associate Director of Clinical, presented a 30-minute webinar entitled “Taking Care of Yourself and Your Loved Ones,” as part of the Department of Psychiatry & Behavioral Sciences mental health series. The webinars were designed to provide practical expert advice for Duke University and Duke Health community members and their families who may be struggling with different mental health challenges. (Watch here)

Education and Dissemination

Transitions

Dr. Sagar Lad (MIRECC Postdoctoral Fellow, Salisbury site) will be completing his two-year program in August 2021 and has accepted a position at the Salem VA Medical Center as a Staff Neuropsychologist.

Invited Lectures & Presentations

Nieuwsma, JA. ACT for Clergy and Pastoral Counselors. Invited podcast interview recorded for the Open Div Summit. February 9, 2021. Virtual. (Read more)

**RESOURCES FOR VETERANS & FAMILIES**

**PROVIDER EDUCATION**

PACERS is an education program for health care staff who care for Veterans with cognitive disorders and their caregivers. While this program targets rural health care staff, providers working in any setting can benefit from this information.

The PACERS online training curriculum includes six e-learning courses; each course is accredited for 1 hour of continuing education. There are also 5 videos that cover important topics related to cognitive impairment, including driving, self-neglect, challenging behaviors, Alzheimer’s disease, and end-of-life.

**VA Providers:** Take courses using TMS links

**Non-VA Providers:** Use TRAIN links

- **Course 1:** Driving and Dementia-Hanging up the Keys.
- **Course 2:** How to Deliver the Diagnosis of Alzheimer’s Disease.
- **Course 3:** How to Have an End of Life Discussion.
- **Course 4:** How to Identify Self-Neglect.
- **Course 5:** Addressing Decision Making and Safety in Dementia.

VISIT **PACERS** for links to each course.

---

**UPCOMING WEBINARS FOR NATIONAL CBOC MENTAL HEALTH GRAND ROUNDS**

- **June 9 & 10:** Military Sexual Trauma and Courage Group (9am-10am EST).
- **June 14 & 15:** Updated Guide to Brief CBT (9-10am EST).
- **August 11 & 12:** Racial and Social Inequities in Mental Health Practice (9am-10am EST).

Check the website for previous webinars in this series available for credit in TMS.
